

Module 1 Workbook — Design-Ready Content

"Where You Are, Where You're Going"

Purpose of this document: the finished, design-ready *content* for the Module 1 workbook — every label, prompt, helper line, example, and input finalized so it can be dropped straight into visual design. It does not contain styling; it specifies what each element is, what the creator does with it, and how much room it needs. The first section is a reusable design brief that establishes one visual system for all ten workbooks.

How to read the annotations: - **[INPUT: ...]** = the kind of fillable element to draw, plus suggested space. - **[NOTE: ...]** = design intent — what the element is for / how it should feel. - Everything not in brackets is final on-page copy.

SECTION 0 — WORKBOOK DESIGN SYSTEM (applies to all 10 modules)

Audience & tone. Micro to mid-tier creators (10K–500K). The workbook should feel like a confident business tool, not a school worksheet — clean, a little premium, action-first. Short instructions, generous fill space, no clutter.

Emotional arc (every workbook follows this shape). Orient → confront the current reality honestly → deliver a tangible win or asset → point forward to the target. For Module 1 specifically: *honest baseline* → *your pricing-power number (the win)* → *your goal*.

Length & format. Aim for a self-contained piece a creator finishes in 10–15 minutes. Module 1 runs ~4 pages: cover, Part A+B, Part C+D, completion. Design for both print and on-screen fill-in.

Reusable components to build once and reuse across all modules: 1. **Cover block** — course name, module number + title, workbook subtitle, one-line promise, optional progress dots (1–10). 2.

Section header — part letter + title + a one-line purpose statement. 3. **Instruction line** — small,

secondary-weight text directly under a header. 4. **Input glossary (draw consistently every time):** -

Short line — one line, ~60 characters. - *Long box* — 3–4 lines. - *Number field* — boxed, room for

currency/% symbol. - *Checkbox group* — square checkboxes, label to the right. - *Circle-one* — pill

options the creator rings. - *Data table* — labeled rows/columns with fill cells. - *Computed field* —

visually distinct (the creator writes a calculated result here). 5. **Quick-win callout** — a highlighted

box used at the emotional peak of each workbook (in Module 1, the engagement rate). 6. **Reference/**

example callout — a muted box showing a worked example so the creator never wonders what

"good" looks like. 7. **Completion gate** — a "you're ready for the next module when..." box at the foot

of every workbook. 8. **Footer** — module number, page number, and a "next: Module X" handoff line.

THE MODULE 1 WORKBOOK

Cover Block

[NOTE: full-page or top-of-page hero. Confident, branded, sets the tone for the whole course.]

- Course: **The Complete Brand Partnership Playbook**
- **Module 1 · The Partnership Landscape**
- Workbook: **Where You Are, Where You're Going**
- Promise line: *Your honest baseline, your pricing-power number, and the target you're working toward.*
- [NOTE: progress dots 1–10 with dot 1 active.]

PART A — Your Business Today

[NOTE: section header + purpose line. This is the "before" picture – slightly uncomfortable on purpose, but framed as empowering, not judgmental.]

Your purpose line (on page): This is your starting point. Be honest — it's what you'll measure everything this course changes against.

A1. How do brand deals currently reach you? [INPUT: circle-one – four pills:] They don't yet · Only inbound / DMs · I pitch sometimes · I pitch consistently

A2. Roughly what do you earn from partnerships per month right now? [INPUT: number field, currency. 1 line.]

A3. The highest you've ever been paid for a single deal: [INPUT: number field, currency. 1 line.] [NOTE: this becomes a satisfying callback in Module 4 (pricing) – keep it.]

A4. Which revenue streams are you using today? [INPUT: checkbox group – six boxes:] Sponsored content · Affiliate · Ambassadorships · Gifting · Licensing · Co-creation [NOTE: visually mirror the six-stream list from the lesson so it feels familiar.]

A5. Do you currently use a written contract for your deals? [INPUT: circle-one – three pills:] Always · Sometimes · Never [NOTE: callback in Module 7 (contracts).]

A6. Your single biggest frustration with brand deals right now: [INPUT: long box, 2–3 lines.] [NOTE: optional priming microcopy in placeholder, lighter weight:] e.g., *not knowing what to charge, deals going quiet, being ghosted, lowball offers...*

PART B — Your Pricing-Power Number

[NOTE: THE emotional peak of this workbook. Give it the most visual weight on the page. The calculation should feel like an event, and the result should land in the Quick-Win callout.]

Your purpose line (on page): Your engagement rate is your single biggest pricing lever. Let's put a number on it.

Instruction line: Pick a typical recent post — not your best, not your worst. A normal one.

B1. The calculation [INPUT: data table, 4 rows × 2 columns. Left column = labels (printed), right column = number fields.]

Likes	[number field]
Comments	[number field]
Total engagement (likes + comments)	[number field]
Follower count	[number field]

B2. Your engagement rate [NOTE: present the formula visually, then a prominent computed field for the result.] Formula: $(\text{Total engagement} \div \text{Followers}) \times 100 =$ [INPUT: computed field, large, with a % sign. This is the hero number of the page.]

B3. Where you land: [INPUT: circle-one – four pills:] Under 2% · 2–3% (average) · 3–5% (good) · 5%+ (excellent)

Quick-win callout [NOTE: highlighted box beside or under the result.] *This is your first piece of hard evidence — and it works the same at 20K followers or 300K. Whatever your number, it's not a verdict; it's a baseline and a lever. We build your actual rates on top of it in Module 4.*

Reference/example callout [NOTE: muted box, smaller.] *Worked example: $(1,500 \text{ likes} + 80 \text{ comments}) \div 22,000 \text{ followers} \times 100 = 7.2\%$ — excellent, and a strong argument for premium pricing. The math is identical at any size.*

PART C — Your Audience Snapshot

[NOTE: practical, scannable. This data gets reused constantly, so make it easy to find and copy out later. Consider a two-column layout.]

Your purpose line (on page): Pull these from your platform analytics — it's free, and you'll use it in every media kit, pitch, and brand-fit decision from here on.

C1. Top age range(s): [INPUT: short line.] **C2.** Top locations: [INPUT: short line.] **C3.** Gender split: [INPUT: short line.] **C4.** Top interests / categories: [INPUT: short line.] **C5.** What they ask you to recommend, or what they buy: [INPUT: long box, 2 lines.] [NOTE: C5 is the psychographic gold — give it slightly more room and weight than C1–C4.]

PART D — Your Target

[NOTE: aspirational close. This is the "after" the creator is working toward — keep it forward-looking and motivating. End the body of the workbook on momentum.]

Your purpose line (on page): Now the destination. This is what the next nine modules are building toward.

D1. Revenue streams you're NOT using yet but want to add: [INPUT: long box, 2 lines.]

[NOTE: pulls directly from the unchecked boxes in A4 – designer could visually link them.]

D2. Your target monthly partnership income, 12 months from now: [INPUT: number field, currency, large. 1 line.]

[NOTE: visually pair this with A2 (current monthly) so the gap is obvious – that gap is the course's whole job.]

D3. In one sentence, what would make this course worth it for you? [INPUT: long box, 2 lines.]

Completion Gate

[NOTE: standard component, foot of workbook.] **You're ready for Module 2 when you've:**

[INPUT: 3 checkboxes:] ☐ Captured your "before" picture (Part A) ☐ Written down your engagement rate (Part B) ☐ Noted at least one revenue stream you want to add (Part D)

Bring it all with you — your numbers become the foundation of how you present yourself to brands.

Footer

[NOTE: every page.] Module 1 · The Partnership Landscape · **Next: Module 2 — Finding & Attracting Brands**

End of Module 1 design-ready workbook content.
