

Module 4 Workbook — Design-Ready Content

"Your Numbers, Locked In"

Purpose of this document: the finished, design-ready *content* for the Module 4 workbook. The Rate Calculator does the math; this workbook prepares the inputs, captures the output, and turns it into a presentable range, a floor, and a reusable rate card. Uses the shared workbook design system from Module 1 (cover block, section headers, input glossary, quick-win callout, reference callout, completion gate, footer). Module-specific content below.

Annotation key: [INPUT: ...] = fillable element + suggested space · [NOTE: ...] = design intent · unbracketed text = final on-page copy.

Tool tie-in: references Img.media's Influencer Rate Calculator. Insert the access link at [CALCULATOR LINK].

Cover Block

[NOTE: standard cover component. Progress dots 1–10 with dot 4 active.] - Course: **The Complete Brand Partnership Playbook - Module 4 · Know Your Worth (Pricing)** - Workbook: **Your Numbers, Locked In** - Promise line: *Run a real deal through the calculator, turn the output into a range you can defend, and build a rate card you'll use for years.*

PART A — What You've Been Leaving on the Table

[NOTE: short reframe opener – surfaces the "undercharging" gap honestly. Keep positive: this is money you're about to start capturing, not shame about the past.]

Your purpose line (on page): A quick honesty check. Most creators give these away free. Which have you been charging for?

[INPUT: checkbox group – "I currently charge extra for...":] - ☐ Usage beyond my own channels (reposts) - ☐ Paid advertising use of my content - ☐ Whitelisting / Spark Ads (ads run from my account) - ☐ Exclusivity (not working with competitors) - ☐ Rush turnarounds - ☐ Concepting / strategy work

[NOTE: subtle line below: "Every unchecked box is money you're about to start capturing."]

PART B — Prep Your Deal for the Calculator

[NOTE: gathers the four-step inputs for ONE real deal before the creator opens the tool, so the run is fast and accurate. Mirror the calculator's 4 steps as four mini-blocks. Pull engagement rate forward from Module 1.]

Your purpose line (on page): Gather these for a real deal you're weighing, then run them through the calculator at [\[CALCULATOR LINK\]](#).

Deal / brand: [\[INPUT: short line\]](#)

Step 1 — Basics [\[INPUT: three short fields inline\]](#) - Followers: [\[number\]](#) · Engagement rate (from Module 1): [\[number, %\]](#) · Niche: [\[short line\]](#)

Step 2 — Deliverables [\[INPUT: small table, 4 rows. Columns: Platform · Content type · Quantity\]](#)

Platform	Content type	Qty
[fill]	[fill]	[fill]

Step 3 — Usage & terms [\[INPUT: quick-select fields\]](#) - Use: [\[circle-one\]](#) Organic only · Paid advertising - Duration: [\[circle-one\]](#) 30d · 90d · 1yr · Perpetual [\[NOTE: visually flag Perpetual as ▶\]](#) - Whitelisting / Spark Ads (+30%): [\[checkbox\]](#) - Exclusivity: [\[circle-one\]](#) None · 30d · 60d · 90d - Long-term (3+ months)? [\[checkbox\]](#) [\[NOTE: if checked, note "→ see Module 9 \(ambassadorships\)"\]](#)

Step 4 — Final details [\[INPUT\]](#) - Clear payment terms? [\[checkbox\]](#) · Revision rounds: [\[circle-one\]](#) 1 · 2 (standard) · 3 (ceiling) · 4+ ▶

PART C — Your Output → Your Range

[\[NOTE: THE core deliverable. The creator records the calculator output, then converts it into a presentable range with rationale. Give the range the most visual weight.\]](#)

Your purpose line (on page): Run the calculator, then turn the number into something you present with confidence.

C1. Calculator output for this deal: [\[INPUT: number field, large\]](#) [\[NOTE: producer/designer note – output may be a single rate or a range depending on tool; provide one large field plus an optional second for a high end.\]](#)

C2. Build your presentable range [\[INPUT: two number fields – Low / High\]](#) - Low (straightforward project, standard usage): [\[number\]](#) - High (rush, extensive usage, whitelisting, complex): [\[number\]](#)

C3. Your one-sentence range pitch — fill in the blanks: "A [\[short line: deliverable\]](#) typically runs [\[low\]](#) — [\[high\]](#), depending on usage rights and timeline." [\[INPUT: combined fill line. NOTE: this is the exact sentence they'll use with brands – make it feel like a script.\]](#)

C4. Your floor (keep this private): the minimum below which this deal isn't worth it:

[\[INPUT: number field\]](#) [\[NOTE: callout – "You'll use your floor constantly in Module 6. Know it before any conversation."\]](#)

Reference/example callout [\[NOTE: muted box.\]](#) Example: Output ≈ \$1,750 for a Reel + 3 Stories with paid-ad usage and whitelisting. Presented range: "\$1,500–\$2,000, depending on usage and timeline." Floor: \$1,200.

PART D — Your Rate Card

[NOTE: reusable go-to numbers so the creator is never caught off guard by "what do you charge?" Design as a clean, fillable rate table they keep and update quarterly. This is a keeper asset.]

Your purpose line (on page): Your go-to numbers. Fill these once, update quarterly, and never freeze on "what's your rate?" again. Base = organic, your channel only.

[INPUT: rate table, ~7 rows. Columns: Deliverable (printed examples) · Base rate · + Paid-ad usage · Notes]

Deliverable	Base rate	+ Paid-ad use	Notes
Instagram feed post	[fill]	[fill]	
Instagram Standard Reel	[fill]	[fill]	
Instagram Stories (set of 3–5)	[fill]	[fill]	
Instagram Carousel	[fill]	[fill]	
TikTok video	[fill]	[fill]	
YouTube integration	[fill]	[fill]	
YouTube dedicated video	[fill]	[fill]	

Quick-win callout [NOTE: highlighted box.] Add-ons to remember, every time: Whitelisting +30% floor (negotiate up to 1.5–2× for big ad spend) · Exclusivity (scale by length) · Rush +25–50% · Concepting from \$500. These are the lines most creators forget — and they're often the biggest part of the deal.

[NOTE: small deal-health reminder strip at foot of Part D: "Before you accept: 50% upfront · clear payment terms · never accept 'exposure.' (Full tactics in Module 6.)"]

Completion Gate

[NOTE: standard component.] **You're ready for Module 5 when you've:** [INPUT: 4 checkboxes:] ☐ Run a real deal through the Rate Calculator (Part B) ☐ Built your presentable range + one-sentence pitch (Part C) ☐ Set your floor / walk-away minimum (Part C) ☐ Filled in your rate card (Part D)

Bring your range and rate card to Module 5 — a creator who knows their numbers pitches like a business.
